Sarah –

I imagine folks are very interested in a short update from R8 on the Gold Mine Response, it has made national news and the Administrator was out here yesterday. I can give a short 2-3 minute update with a focus on QA if you think that would be appropriate.

For the QCIX call,

I am ok giving an abbreviated 2-3 minute issue background similar to what I presented to Monica/Anne/Carol on the last day of the Lean event if folks think that would be helpful in the first part listed below, might also be helpful to set the tone for continued collaborative problem solving.
